

Dementia Support Australia

Funded by the Australian Government
A service led by HammondCare

Delivering services in NSW/ACT

DSA has supported over 6,100 cases in NSW/ACT in 2022*

This includes people living with dementia at home, in community settings, residential care and acute care services. We work in partnership with local care networks to deliver quality outcomes to Australians.

Our program has supported 83% of the 880 residential aged care homes in 2022

The profile of clients accessing DSA services*

DBMAS Dementia Behaviour Management Advisory Service

The Dementia Behaviour Management Advisory Services support clients where behaviours impact on their care either at home, or in residential care settings.

Our national story since 2016

BPSD* in the dementia landscape

*Behaviours and psychological symptoms of dementia

90% of people living with dementia experience BPSD

BPSD is distressing and disruptive to people with dementia and carers

Psychotropic medications remain overprescribed in the treatment of BPSD

Our work across Australia

**Supported over
66,000 cases**

**Supported 97%
of aged care homes**

Our impact

“How delighted I was when I visited dad yesterday. For the first time in months he had a genuine smile on his face. He seemed happy and joyful, addressing me by name and asking after other family members... Medication changes alone cannot be the whole explanation. I am confident that (DSA) staff have played a major part.”

– Daughter of DSA client, Jerry

59% Reduction in
behaviour severity

64% Reduction in
carer distress

43% Reduction in number
of behaviours
